Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hiroyoshi (JP6239198).

Hiroyoshi discloses an airbag device mountable on a motor vehicle with a hood panel, the airbag device comprising an airbag inflatable in front of the vehicle and then to be disposed between a pedestrian and the vehicle, the airbag comprising one or more pieces of bags; and the airbag comprising a front cover portion, and two fall preventing portions for respectively covering the vicinities of the left and right edges of a top surface of the hood panel, the fall preventing portions being projected upward so as to prevent the pedestrian from falling down. The airbag further comprises a cushion portion for covering the hood panel, the cushion portion being located between the left and right fall preventing portions and having lower height than the left and right fall preventing portions. The cushion portion is inflatable with inflation gas. The airbag comprises three pieces of bags; in two bags out of the three, the rear parts constitute the left and right fall preventing portions while the front parts constitute left and right parts of the front cover portion; and the remaining one bag constitutes a central portion

of the front cover portion, as shown in figures 8 and 10. The airbag is configured as a single piece including the front cover portion and the left and right fall preventing portions, as shown in figure 3.

***Allowable Subject Matter***

3. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
